

Precision Discharge Air Control with the Rawal APR-E® Valve

Control any single or 2-stage DX system to a precise discharge air setpoint with our electrically driven & electronically controlled **APR-E™**. This Rawal Valve is an external compressor unloader for aftermarket installations. The **APR-E™** provides modulation for any DX air-conditioning system and is easily integrated into an existing BAS/BMS or with a stand-alone controller for New or Retrofit Systems.

OBTAIN THE
FLEXIBILITY
OF A CHILLED
WATER SYSTEM
ON A
DX BUDGET!

- Dew Point Control for critical environments
- Applicable to any VAV/MUA/DOAS systems
- Reset DAT to minimize reheat for energy savings
