

MANUFACTURER OF THE APR CONTROL

The APR Control

For HVAC Contractors & Facilities Managers

Dynamically modulate your HVAC unit's capacity to match real-time conditions in any space to ensure optimal performance, energy efficiency, and precise climate control.

✓ Enhance Space Comfort

Consistent temperatures and better dehumidification means less clammy or muggy feelings. Just the right comfort!

✓ System Reliability

Protect your system and avoid unexpected disruptions to your business. Less of a need for costly repairs saves you money now and in the future. Enjoy peace of mind knowing your system works when you need it to!

✓ Protect your Investment

Get the most out of your HVAC equipment by extending the lifespan with the APR Control.

✓ Save Energy

The APR Control reduces power consumption, which directly translates to lower operating costs. Less power per hour!

The APR Control is your answer to Comfort, Reliability, and Savings. It's a win-win for your business!
